WHAT WE DO

FLEETSUPPORTTHATCOMES TO YOU.

Pompidelik Heavy Rescue supports commercial operators with hands-on mechanical, diagnostic and fabrication support at the vehicle, yard, site or workshop where practical.

01 MOBILE BREAKDOWN ASSISTANCE

On-site fault finding and practical repair support when a vehicle or piece of equipment is down and needs attention quickly.

02 REPAIRS & SERVICING

Mobile mechanical repairs and scheduled service support for commercial vehicles, bakkies and fleet units.

03 DIAGNOSTICS & FAULT FINDING

Diagnostic support to identify the cause of faults and reduce unnecessary parts replacement, guesswork and repeat downtime

04 TRUCK & TRAILER REPAIRS

General mechanical and repair support for trucks and trailers, including practical on-site assistance where the job allows.

05 TRAILER FABRICATION & REPAIRS

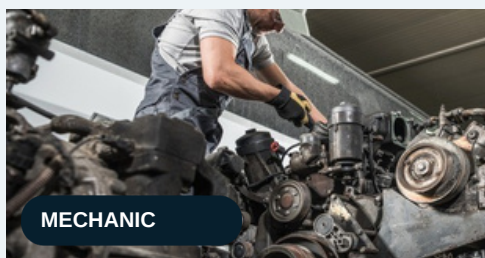

Trailer repairs, modifications and fabrication work for operators who need robust, practical solutions rather than off-the-shelf answers.

06 WELDING & CUSTOM FABRICATION

Boilermaking, welding and custom fabrication for fleet, workshop, trailer and commercial applications.

POMPIDELIK

WHY KEEPPOMPIDELIK ON YOUR SUPPLIER LIST?

MECHANICAL SKILL + FABRICATION CAPABILITY IN ONE CALL.

From fault-finding and repairs to welding and custom fabrication, Pompidelik is built for the jobs that do not always fit neatly into one category.

YOU DO NOT HAVE TO REPLACE YOUR CURRENT PROVIDER.

Keep us as the backup number your operations team, workshop, dispatcher or drivers can call when your normal supplier is unavailable or the job needs a different set of skills.

ONE CONTACT. MULTIPLE CAPABILITIES.

Mechanical support, diagnostics, trailer work welding and fabrication reduce the need to coordinate several separate suppliers for practical fleet problems.

BUILT FOR REAL-WORLD PROBLEMS.

Not every breakdown has a textbook answer. Our approach focuses on fault finding, workable repairs and solutions that make sense for the equipment and situation.

MOBILE WHERE PRACTICAL.

We come to the vehicle, yard or site where possible, helping reduce unnecessary movement and lost operating time.

A USEFUL SECOND NUMBER TO HAVE.

Even well-supported fleets get caught when workshops are full, suppliers are delayed or an unexpected breakdown happens after hours.

SERVICE AREA

Alberton • Germiston • Boksburg • East Rand • Greater Johannesburg • Vereeniging • Vanderbijlpark • Vaal Triangle • Rustenburg • North West • Surrounding Areas
